

## Royal Mail Class 325 EMU Pack

Released January 2010 for UKTrainsim

Model created by Dave Babb

This texture by Anton Courtney-May

*ALL Copyrights belong to their respective owners.*

*This model is NOT for commercial use either, nor is it 'Public Domain'*

*Please see original readme for more information.*

### Download Information

This download contains Running numbers 325008/010/016 in Royal Mail livery. The model was created nearly 8 years ago and remained untouched until now. These new textures give the model a new lease of life. I repaint uses a mixture of 2048 & 1024 textures to achieve the highest detail. Obviously with the model being so old it's not perfect but should hopefully create a good stop gap until someone builds a new one. The folders are completely independent from the previous version. Updates include new textures, lighting, cabview, sounds & other .eng/wag modifications. Thanks to Dave Babb for creating this model all those years ago.

The download comes with consists for each unit, plus one for all 3 units connected together.

### Installation Notes

Extract the .exe file and follow the instructions on the installer. The installer will automatically detect where your MSTs directory is. If for some reason this is incorrect, please correct this before continuing to Install.

**Cabview:** The cabview can be found on UKTS. The File ID is: 11878. You will need this setup as a common cabview.

**Sounds:** The Unit uses the Class 321 sounds that are supplied with the Making Tracks Route, Great Eastern. If you do not have this route then you will need to download alternative sounds.

If you have any issues please email [antoncm@btinternet.com](mailto:antoncm@btinternet.com) or contact me via the forums [username: backfoot2002].

Thank you for downloading.

**DISCLAIMER:** *I am not responsible for any damage to your system, please backup files BEFORE making a new installation, as it is much easier to correct errors that may occur.*
