

RailWorks 3 – Train Simulator 2012

Class 158 Headlight Modification

Hello. Thank you for downloading my Class 158 headlight modification for RailWorks 3: Train Simulator 2012.

What does this modification do?

RailWorks 3 was upgraded with brand new headlights that actually illuminate track and objects ahead of the train, when you switch on the headlights as you would normally. This was only fitted to default (core) RW stock (such as the Class 47, HST etc). This is a **temporary** modification until RailSimulator.Com releases an update to fix the Class 158. This modification ONLY fixes the default Class 158's, which are:

- Default (Regional Railways)
- CT (Central Trains)
- NR (Northern Rail)
- NSTPE (TransPennine Express – ex-Northern Spirit)

How do I install it?

Providing you have extracted the .zip file to somewhere handy (desktop is ideal), just follow the instructions below.

First off, go to this folder:

C:\Program Files

(x86)\Steam\steamapps\common\railworks\Assets\Kuju\RailSimulator\RailVehicles\Diesel\Class47\Default

And now copy the entire folder called “Lights”.

Now, go to this folder:

C:\Program Files

(x86)\Steam\steamapps\common\railworks\Assets\S9BL\Class158Pack\RailVehicles\Diesel\Class158\Default

And paste the folder into here. Go ‘up’ a folder so you are in the “Class158” folder.

Now, if you have the default sounds that came with the Class 158, go into the “Original Sounds” folder. If you however have the Armstrong Powerhouse (featuring two-tone horn and buzzer), go into the “Armstrong Powerhouse Sound Pack Files” folder.

Next, copy the “Default”, “CT”, “NR” and “NSTPE” folders from the extracted folder into the folder you are in (the Class 158 one).

When asked to overwrite, say yes.

Finally, launch RailWorks 3 and on the splash/start-up screen, select the “Tools & Docs” tab. Click on the button that says “Clear cache” and launch RailWorks 3 on your favourite route.

Who made this?

Sean Harris (thetrainfan, UKTS) (Sean, RWTS).

Many huge thanks to Chris (firetrap1, UKTS) for help and guidance.

Thank you also to Ben Laws for producing the Class 158 add-on.

I am not responsible for any damage or nastiness that this may cause to your PC.

This pack is not to be distributed to anywhere other than UKTrainSim and RWTrainSim, without my explicit permission. This is so I can keep track of where my downloads are.

Thank you for downloading this pack. I hope you find enjoyment and use out of it. Don't forget – if you like it, please use the Facebook 'like' system and commenting system on UKTS and rate, comment and 'thank' me on RWTS! Sean Harris

Version 1.1 – Added Armstrong Powerhouse .bin files.
