Installation

These scenarios are packaged in the same ".rwp" file. Install it through Train Simulator 2013 package manager that you will find in your railworks folder (Utilities.exe).

Remark

The first version of some of the 7 first scenarios required some German Railroads' stuff that has been replaced with virtualRailroads' one in the actual version. You can find these old versions in a folder included in this package, but no more support will be given for them. If you want to install them, delete the actual version of the selected scenario in TS2013 editor and then install the GR version of the scenario through the package manager.

File history

Version 1.3: • BR185 v2.0 and BR146 v1.0 swapped with newer versions.

Version 1.2: • Previous BR185 swapped with version 2.0.

Version 1.1: • TS 2013 compatibility check
• Old or incompatible rolling stock removed or swapped
• Download links updated

Thanks

I'd like to thank all route and rolling stock/reskin creators.

Thanks to:

- Ralf Kroneberg for the German translations.
- Etienne Ammerdorffer for the Dutch translations.
