

(BLXT) SNCB M6 reskin pack (Train Simulator 2017)

Introduction

In order to add some Belgian rolling stock to TS2017, I have decided to repaint the German bilevel coaches that are included with the route "Cologne Koblenz". These repaints are totally fictional but aim to approach the reality.

What does include the pack ?

The pack is including:

- three vehicles: M6 A (1st class), M6 B (2nd class) and M6 Bx (2nd class cab car)
- Belgian destinations (see below)
- real UIC numbering for each type of vehicles
- some PreLoad consists

How do I install the pack ?

Follow these steps:

- 1) Simply copy the content of this zip file to your railworks directory. Click OK to allow any merge of folders.
- 2) Open the .ap file in the folder DTG/CologneKoblenz.
- 3) Navigate in the .ap file to 'RailVehicles/Electric/DB146/Driving Trailer/Engine' and copy the file '146_Driving_Trailer.GeoPcDx' to 'RailVehicles_SNCB_M6B/Electric/DB146/Driving Trailer/Engine'.
- 4) Navigate then in the .ap file to 'RailVehicles/Passenger/Coaches' and copy the file 'DABpza.GeoPcDx' to 'RailVehicles_SNCB_M6B/Passenger/Coaches' AND 'RailVehicles_SNCB_M6A/Passenger/Coaches'.
- 5) Restart the program. You will now be able to use the pack.

How do I use the pack ?

It's quite simple. When inserting a vehicle in the scenario editor, you can change its destination by double-clicking on it. In the window appearing on the right of the screen, you find its number which is preceded by a letter. This letter is related to a destination. If you change it, the destination blind also changes. By default, the blind is black.

Destinations

Letter	Destination	Letter	Destination
A	IC Bruxelles-Midi	a	IC Brussel-Zuid
B	IR Bruxelles-Midi	b	IR Brussel-Zuid
C	IC Bruxelles-Nord	c	IC Brussel-Noord
D	IC Schaerbeek	d	IC Schaarbeek
E	IR Bruxelles-Nat-A.	e	IR Brussel-Nat-L.
F	IC Charleroi-Sud	f	IC Antwerpen-C.
G	IC Mons	g	IC Oostende
H	IC Saint-Ghislain	h	IC Brugge
I	IC Tournai	i	IC Gent-Sint-Pieters
J	IC Mouscron	j	IC Knokke
K	IC Quiévrain	k	IC Blankenberge
L	IC Quévy	l	IC Kortrijk
M	IR Quévy	m	IC Tongeren
N	IC Binche	n	IC Genk
O	IR Binche	o	IC Hasselt
P	IC Ath	p	IC Essen
Q	IC Dinant	q	IR Noorderkempen
R	IC Namur	r	IR Landen
S	IC Arlon	s	IR De Panne
T	IC Luxembourg	r	IC Poperinge
U	IR Louvain-la-N.	u	IC Lokeren
V	IC Liers	v	IC Turnhout
W	IC Liège-Palais	w	IC Sint-Niklaas
X	IC Liège-Guillemins	x	IC Leuven
Y	IC Welkenraedt	y	IC Dendermonde
Z	IC Brussels-Airport	z	Empty
#	Empty		

How do I find the PreLoad consists ?

To use the PreLoad consists, you need to have the DB Vectron DC from RSSLO (see Railtrraction webshop) installed with its SNCB 1801 repaint that you can find on railsim-fr website (<http://www.railsim-fr.com/forum/index.php?app=downloads&showfile=1123>).

In your QuickDrive screen, search for either '1801 SNCB' or 'SNCB M6 Bx'.

For questions or comment, please send an email to railworks@beluxtrains.net

Enjoy !

Christophe Durvaux (June 2017)
